Allowable Subject Matter

Claims 1-5, 8, 21-25, 34, 36-39 are allowed.

Examiner's Statement of Reason for allowance

The following is a statement of reasons for the indication of allowable subject matter:

The most relevant reference is the *Adams et al* reference.

The *Adams et al* reference discloses aspects of loan syndication involving interchanging documents. A network service provider provides a web-based computer communication system for managing and developing transaction-related data, such as may be used for funding a syndicated loan, or for closing a business deal involving multiple unrelated business organizations. Communication system provides a virtual network connection among a lead bank, a borrower, and respective groups of associate banks or investment entities selected by the lead

bank for each of a plurality of syndicated loan offerings. Communications between borrower and lead bank includes on the borrower's side various personnel such as its respective legal counsel team, its respective financial advisors, and other advisors including external advisors to the borrower. Similarly, on the lead bank's side such personnel includes its respective legal counsel team, its respective financial advisors and other advisors including external advisors relative to the lead bank. The foregoing communications among such diverse personnel may be in connection with negotiating the terms of a respective loan offering and may be carried out securely over the virtual network associated with the respective loan offering. In conjunction with negotiating the terms of the loan offering, a package of transaction offering documentation, such as a loan information memorandum including applicable legal, regulatory and financial documentation can be prepared by the lead bank, with drafts and revisions of the memorandum and communications relative to it being passed over the virtual network among the lead bank, the borrower, and their respective advisors.

The *Adams* reference fails to disclose a method for for negotiating and managing loan syndication comprising steps of:

Receiving a request to post a requirement to syndicate a loan opportunity by a first entity over a network; and providing ratings associated with entities based on past syndication data.

Updated searches revealed no references that disclosed the claimed invention, nor were any further references identified which could be reasonable combined with *Adams reference*.

For this reason, claims 1-5, 8, 21-25, 34 and 36-39 are deemed to be allowable over prior art of record.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
